

# Hydrogen support programmes of the German government

*Green hydrogen - opportunities and challenges for the economy*

Madame Ellen von Zitzewitz  
Federal Ministry for Economic Affairs and Climate Action  
Climate and Energy Cooperation with the MENA Region  
20 December 2022

# Germany develops a domestic market for hydrogen and paves the way for imports

Hydrogen (H<sub>2</sub>) volumes foreseen

# Germany provides targeted funding instruments to support green hydrogen projects worldwide

**H2!Global:** Auction-based promotion of international green hydrogen projects

**PtX Platform:** Leveraging finance for projects along PtX value chain in producing countries

**National Funding Guideline** for bilateral hydrogen projects in non-EU countries

**H2Uppp:** H2Uppp accompanies and supports efforts to ramp up the market for green H2 and PtX applications in cooperation with the private sector

# European Hydrogen Backbone

- The European Hydrogen Backbone (EHB) initiative consists of a group of thirty-one energy infrastructure operators.
- Elaboration of a vision of a pan-European hydrogen transport infrastructure.
- Consideration of Import/Export infrastructure.

# Thank you for your attention!
